MINIMUM LIFE'S PRINCIPLES

“Many living requirements and needs are missing on our life's. Sometimes we stay for days with no food for my children and wife, especially during the pandemic when it became hard to go out and look for a living.” Adnan said.

Adnan is a displaced household who had to flee with his wife, 6 kids and his elderly mother. Adnan and his family rely on the food they got from humanitarian assistance, besides, he collects plastic bottles as a source of income, even though, the money he makes doesn't cover his family basic needs. Adnan and his family have been living in a small tent since they fled. The tent got worn out really fast because of the strong winds and heavy rains which led them to suffer from leaking, cold weather and sun heat. As Adnan was struggling to keep his home standing, his kids were also fighting to get water. Since the only close water source is 30 minutes walking, they get the water from an abandoned well in which the water is non-potable, contaminated and may cause diseases. However, it's the only nearby free source of water.

“my kids bring the water after school every day which takes them around 15-30 minutes to bring water because we have neither a vehicle nor an animal to carry the water.”

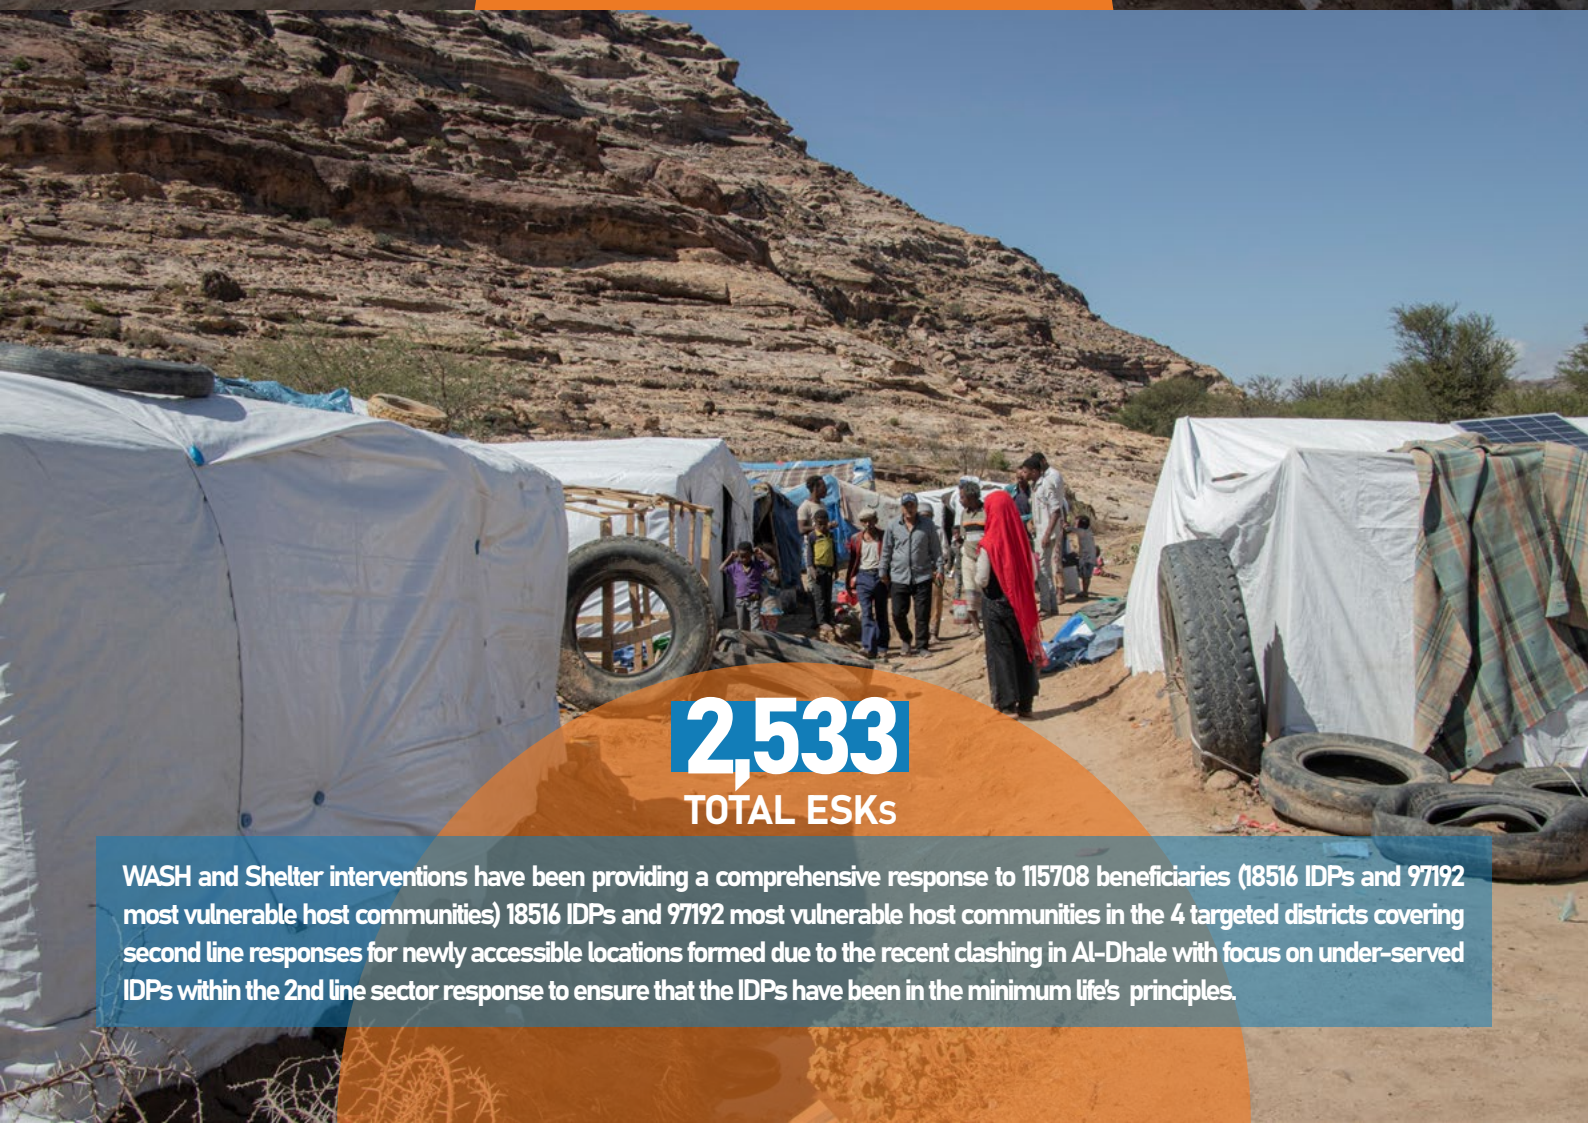

Funded by (YHF), YFCA intervention in this district was by providing non-food items and emergency shelter kits for IDPs and the most vulnerable host communities. After registration and verification, YFCA team distributed 380 (NFIs), 180 (ESKs) to the most vulnerable IDPs cases at Juban, Damt, and Al-Hushaa districts in Al-Dhale'e Gov.

A photograph showing two men standing in front of a large, white, tent-like structure made of tarpaulin. The man on the left is wearing a white button-down shirt and a patterned sarong. The man on the right is wearing a grey and orange striped polo shirt and a light-colored sarong. They are standing on a dirt ground with some rocks. In the background, there are some green trees and a clear blue sky.
