

A LIFELINE FOR HANAN HEALING AND HOPE

Hanan Jamal, a one-year-old girl from Ad Dali' city, faced a dire situation as she battled Severe Acute Malnutrition (SAM). Her condition was alarming—extreme wasting, constant lethargy, and a heightened vulnerability to diseases threatened not only her health but also her life.

Hanan's family, much like many others in the region, endured significant economic hardship. With her father struggling to find consistent work, resources were limited, making access to essential healthcare and nutritious food nearly impossible—a reality that left Hanan teetering on the brink of despair.

In light of her urgent need, Yemen Family Care Association (YFCA) intervened through its project, “Provision of integrated lifesaving assistance in 6 sectors to the IDPs and the most vulnerable groups in Ad Dali’ city, Ad Dali’ gov,” funded by Yemen Humanitarian Fund (YHF). Recognizing the critical condition Hanan was in, YFCA acted swiftly to refer her to the Therapeutic Feeding Center (TFC) at Alnasr Hospital, where she could receive the specialized care vital for her recovery.

Hanan Receiving Care at the Therapeutic Feeding Center

YFCA ensured that financial barriers would not obstruct Hanan’s access to care, covering all associated costs, including transportation and treatment. This prompt and compassionate response opened the door for Hanan to receive the necessary medical attention in a timely manner.

At the TFC, Hanan was provided with the therapeutic feeding and care essential for her recovery. Over the following weeks, she demonstrated remarkable progress—regaining strength and weight, and transforming from a lethargic infant into an active, vibrant child. Her recovery was a testament to the effectiveness of YFCA’s intervention.

More than just saving Hanan’s life, the intervention alleviated the emotional and financial burdens that weighed heavily on her family. The approach taken by YFCA combined medical care with an understanding of the family’s economic struggles, creating a sustainable model to combat malnutrition in the community.

“ This support gave us more than medicine; it gave us hope ”

Hanan’s mother expressed her heartfelt gratitude

Hanan’s journey highlights the profound impact of YFCA’s work, supported by Yemen Humanitarian Fund (YHF). It serves as a powerful reminder of how dedicated support can restore health and hope to vulnerable families facing immense challenges.
